IMP NOTE: These are the new season rates for India for the period of October 2013 to September 2014

The volatility in the financial markets and the uncertainty of price increases have caused delays in getting the new rates for India. There is nearly 20% inflation in India over the last two years, and recently three separate fuel increases. This is reflected in the rates above.

We have attempted to keep costs down as much as we can, and are offering more added value inclusions.
